

Course Purchasing System

Name: Vignesh M

Reg no: 23UCS105

Abstract:

The Course Management System is a web-based application designed to facilitate interaction between students and course administrators. The platform enables,

- **User Authentication** - Secure login and registration system
- **Course Browsing** - View available courses with details
- **Shopping Cart** - Add/remove courses before purchase
- **Wishlist** - Save courses for future consideration
- **Order Processing** - Payment simulation and order tracking
- **Admin Controls** - Complete course management capabilities

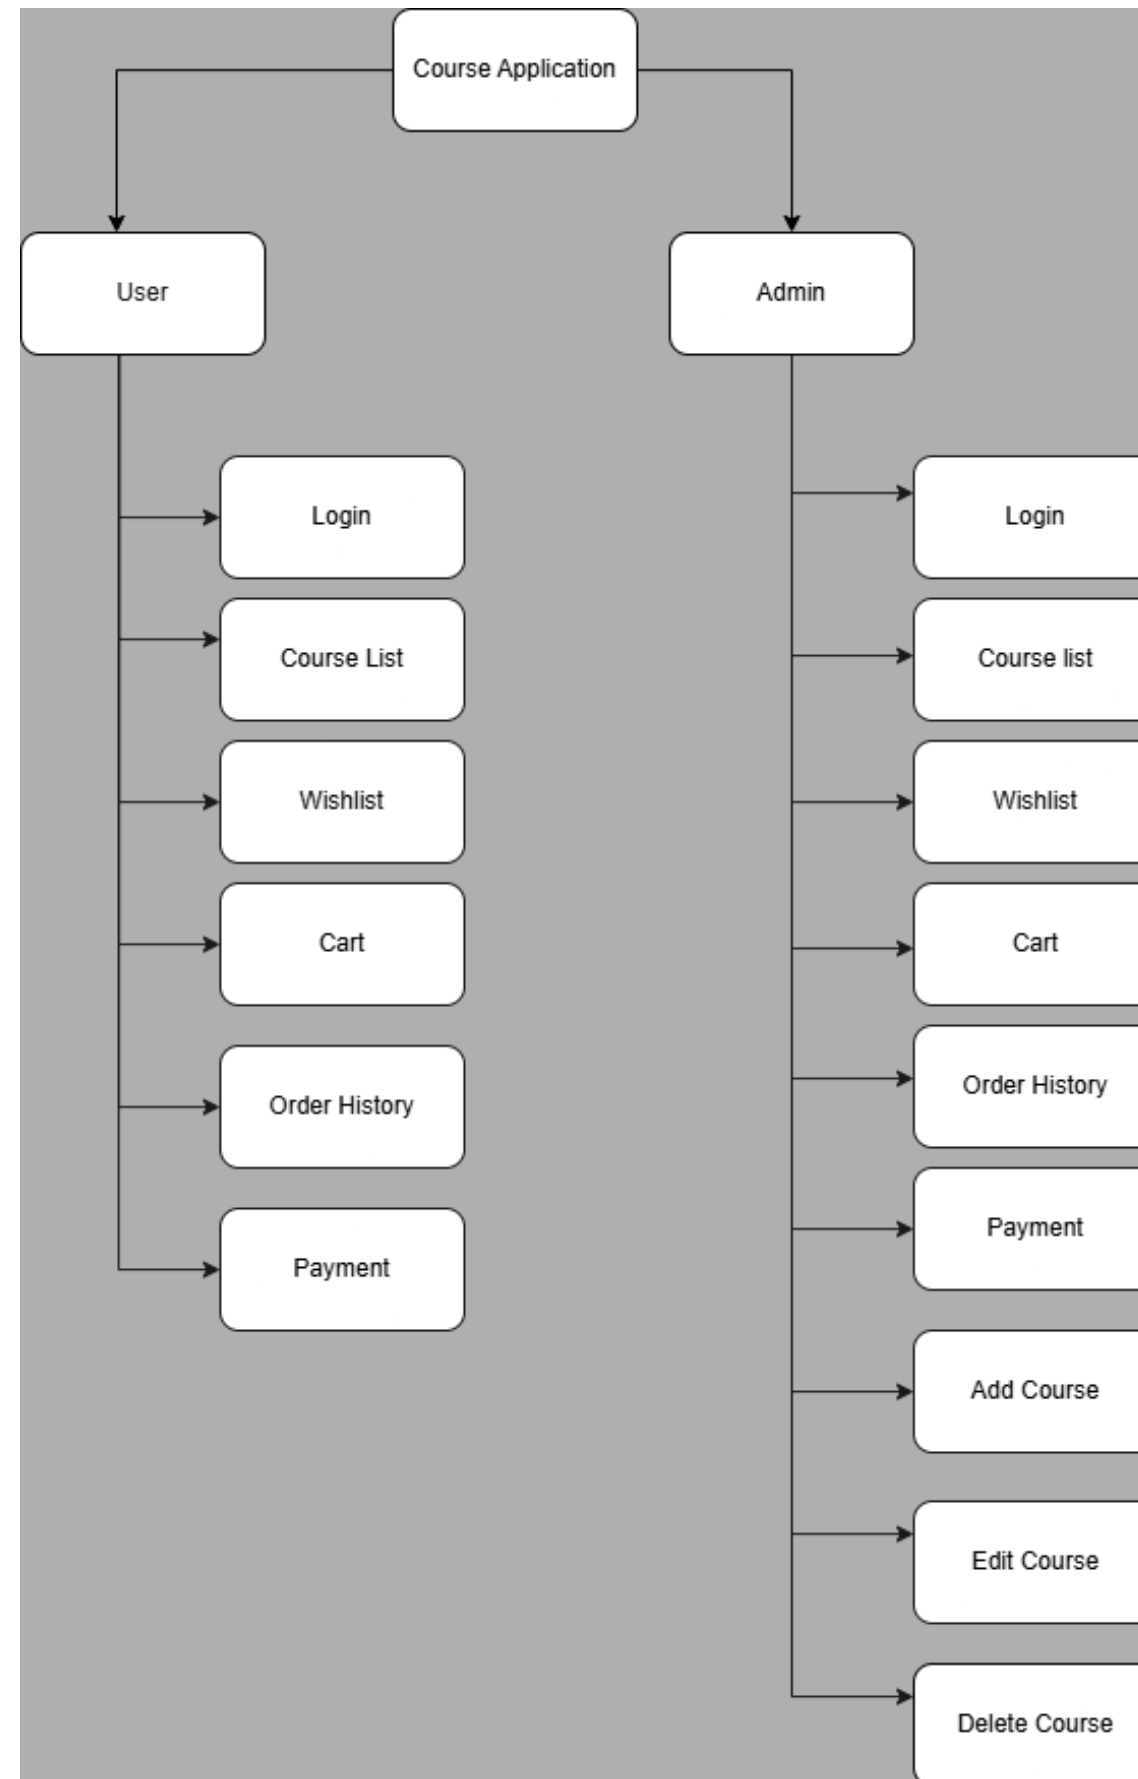

HARDWARE SYSTEM REQUIREMENTS

Component	Server Side	Client Side
Processor	Intel Core i3	Any modern processor
RAM	4 GB minimum	2 GB minimum
Storage	5 GB free	100 MB free

SOFTWARE SYSTEM REQUIREMENTS

Component	Technology
Operating System	Windows/Linux/MacOS
Web Server	Apache/XAMPP
Database	MySQL
Backend	PHP
Frontend	HTML5, CSS3, JavaScript
Browser	Chrome/Firefox/Edge

SYSTEM ARCHITECTURE

MODULES

User Module

- **Authentication** : Create and validate the user details
- **Dashboard** : To show the course list
- **Cart** : To show the course which is ready for the purchase
- **Wishlist** : To display the user's favourite course list
- **Payment** : To purchase the selected courses
- **Order History** : To display the list which the user has already purchased

Admin Module

- **Authentication** : Create and validate the user details
- **Dashboard** : To show the course list
- **Cart** : To show the course which is ready for the purchase
- **Wishlist** : To display the user's favourite course list
- **Payment** : To purchase the selected courses
- **Order History** : To display the list which the user has already purchased
- **Course Management** : Admin can be able to edit delete and add courses

DATABASE TABLES

Login Module

Field Name	Type	CONSTRAINTS
User_id	INT	PRIMARY KEY,A_I
Name	VARCHAR	NOT NULL
Email	VARCHAR	NOT NULL
Phone	VARCHAR	NULL
is_admin	INT	0 OR 1

Dashboard Module

Field Name	Type	Description
Course_id	INT	PRIMARY KEY AND A_I
Course_title	VARCHAR	NULL
Description	TEXT	NULL
Price	INT	NULL
DEAL	INT	NULL
OFFER	INT	NULL

CART MODULE

Field Name	Type	CONSTRAINTS
CART_ID	INT	PRIMARY KEY,A_I
USER_ID	INT	FOREIGN KEY
COURSE_ID	INT	FOREIGN KEY

WISHLIST MODULE

Field Name	Type	CONSTRAINTS
WISHLIST_ID	INT	PRIMARY KEY,A_I
USER_ID	INT	FOREIGN KEY
COURSE_ID	INT	FOREIGN KEY

Order Module

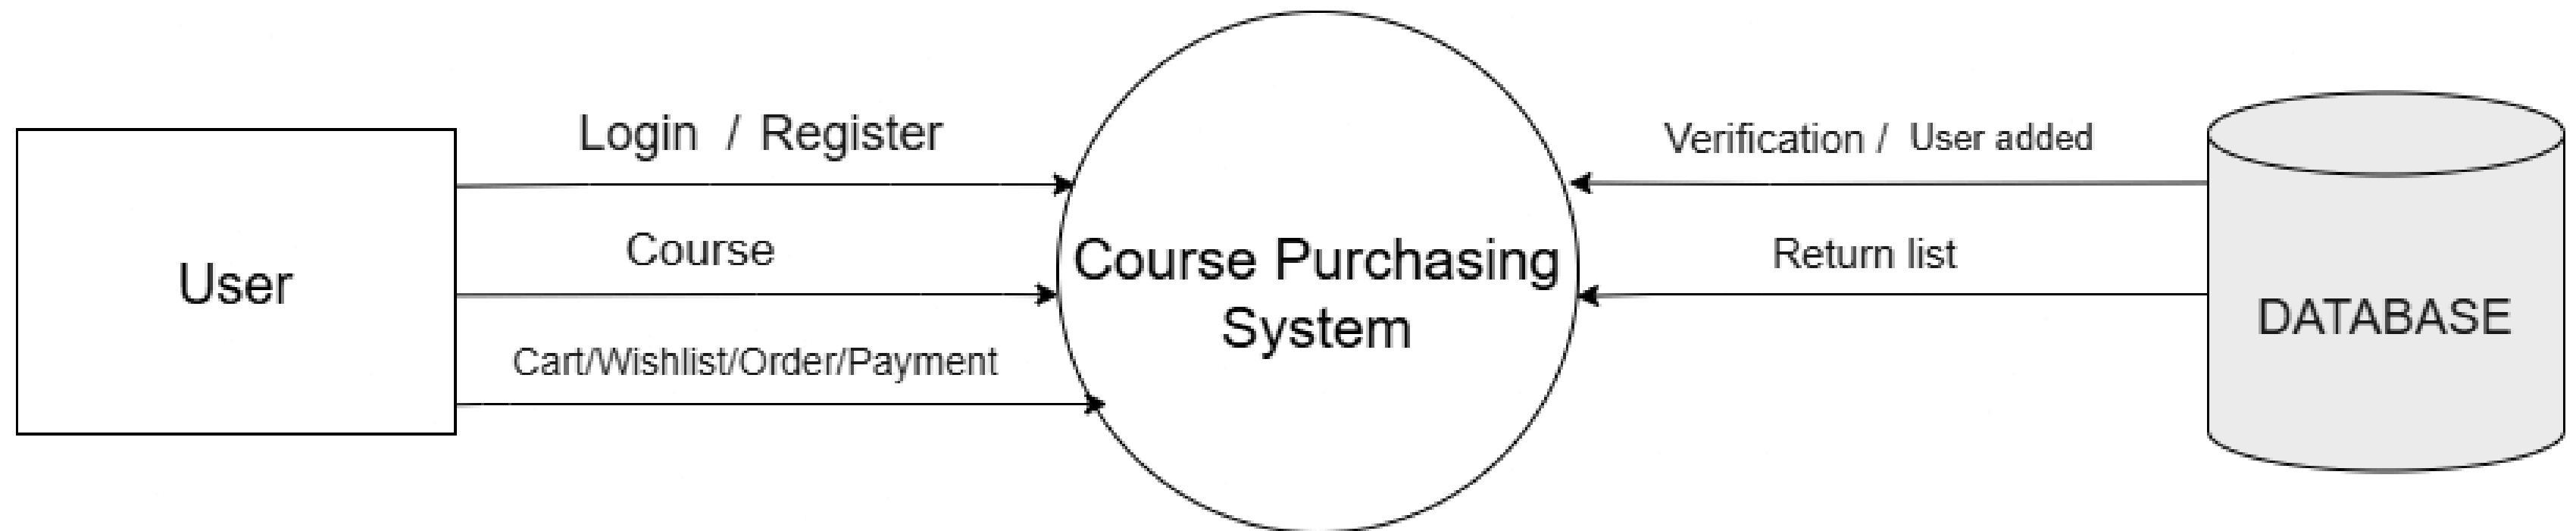

Field Name	Type	Description
ORDER_ID	INT	PRIMARY KEY AND A_I
USER_ID	INT	FOREIGN KEY
TOTAL AMOUNT	DECIAML(10,2)	NULL
PAYMENT STATUS	ENUM	NOT NULL
COURSE_ID	INT	FOREIGN ID
PRICE	DECIAML(10,2)	NOT NULL

Payment Module

Field Name	Type	Description
PAYMENT_ID	INT	PRIMARY KEY AND A_I
USER_ID	INT	FOREIGN KEY
ORDER_ID	INT	FOREIGN KEY
AMOUNT	DECIMAL(10,2)	NOT NULL
PAYMENT_STATUS	ENUM	AS DEFINED PENDING
PAYMENT_DATE	DATE TIME	CURRENT_TIMESTAMP

Conclusion

In conclusion, our Course Management System is a fully functional website that allows students to browse, save, and purchase courses. The project successfully demonstrates secure user authentication, database management, shopping cart functionality, and order processing in a user-friendly interface. This system serves as a solid foundation that can be expanded into a real-world e-learning platform.
